

ANNUAL REPORT 2019-20

Navjyoti Manovikas kendra was established in the year 1988 hence this year we have completed 31 glorious years. Navjyoti Manovikas Kendra is a school built for children with special needs. We have children who are suffering from various disorders like Cerebral Palsy, Mental Retardation, Autism, Down syndrome and multiple disabilities.

We strongly believe that poverty and disability does not come in the way of realising one's latent potential, what is required is proper access to education and opportunities.

We have been working to bring our children to mainstream by providing them proper education, vocational training and employment opportunities depending on their skills and IQ levels. With god's grace we have been successfully growing over the period of time and emerged as a big hope for disadvantaged children of the society. We continue to identify and work for socio - economically deprived and mentally insufficient children with aim to make them self reliant and lead healthy, dignified and sustainable quality of life.

At present we have strength of 102 students who are attending the school and are being benefitted with the services like vocational training, academics (specially designed for every student as per their IQ level), extracurricular activities and therapeutic help. A lot of emphasis is being put on learning of daily living activities to make them more self dependent and self reliant.

We have Physiotherapy center managed by qualified physiotherapists where children are being treated as per their conditions and needs on 1:1 basis.

To make the learning more fun and easy we have “SMART CLASS” system – where students are showed rhymes, videos and movies over a projector.

This year we have been privileged to have a tie up with AIIMS Jodhpur; Rehabilitation center. Now every month’s last Saturday we have doctors team who come for health check up of our school children. Not only students but their parents are also active members of these sessions. Parents are being counseled and guided by this team of doctors.

Admission:

Every new student brought for admission undergoes a detailed examination and assessment by our experienced and qualified rehabilitation team and special educators. After this the child is sent to our physiotherapist for any neuromuscular or orthopedic deformity. A detailed evaluation of functional level is being done and then only the placement takes place.

The criterion of distribution of the children in classrooms is based on the basis of their IQ score and chronological age. Majority of our children in the school are distributed according to their mental ability as well. Each child's educational program is made on the basis of their IQ and functional ability. Each classroom has strength of 8 to 10 students to assure personal attention of the teachers and easy learning.

The school starts at 9:00 am with morning assembly – where students pray, dance, sing rhymes and hymns, do yoga. After this classroom wise the students engage in different activities. After recess every child gets exposure to pre- vocational and vocational activities as per their interest, skills, and abilities.

The vocation is finalized by the vocational instructors after observing the child's aptitude, ability, skills, interest and physical condition.

At present there are the following vocational activities are available:

1. **CHALK MAKING:** chalks are made by the older male students under the supervision of a vocational trainer. The final product is being sold to majorly the educational institutes.

2. **ART & CRAFT:** our students have a good hand on envelope making, paper bags, greeting cards, diyas, Mala, folders etc. Children under this vocation also make flower garlands, rakhis, bandanwars, curtain hangings, artificial jewellery, friendship bands, kakandora etc. all these items are highly in demand.

3. **CANDLE MAKING:** Our students are trained to make variety of candles (floating candles, gel candles, candles with different shapes and sizes). Candles are

made with a lot of precision and while abiding by safety measures.

4. **BROOM MAKING:** A few of our children are being trained in making Brooms by a trained vocational trainer in this skill. These brooms are further sold to various shops, schools, institutes and households.
5. **CHOCOLATE MAKING:** Recently we have started making hand made chocolates in school. Under the guidance of vocational trainers our children have started making variety of chocolates, which is good in demand.
6. **HANDICRAFT AND PAINTING WORK:** Few of our children have very good hand over painting and handicraft items. They paint diyas, envelopes, paper bags etc and then with their creative mind they decorate these items.
7. **DETERGENT MAKING:** we also have students who make detergent powders under the assistance of trained teachers. The quality of are detergent is very good along with nominal price, has got a good demand in market.

All these products are being further sold to different small scale to big scale institutions. We are actively participating in various exhibitions under the guidance of trained and skilled vocational teacher along with the children to sell the products.

We are also conducting mini melas, wherein students from different schools visit us and buy our products.

EXTRA CURRICULAR ACTIVITIES

For overall child's development every student is a part of extra curricular activities. This not only helps us to identify their interests, abilities but also helps us in making learning more enjoyable.

The activities are as follows:

- a. YOGA
- b. GARDENING
- c. DANCE
- d. MUSIC
- e. SPORTS
- f. MOVIES

Some of our students have been performing very well in these extracurricular activities. Some have been participating in various district level, state level, national level and international level sports competitions.
